<b>13. ABSTRACT (Maximum 200 words)</b>  The purpose of this review was to integrate validity evidence relevant to the primary use of the Armed Services Vocational Aptitude Battery (ASVAB) as a selection and classification tool for military manpower, personnel, and training systems. The review covers the period from the first use of ASVAB Form 1 in 1966 in the DOD Student Testing Program to the latest reports of the validity for ASVAB Forms 11, 12, 13, and 14. The review presents the evidence for the construct, content, and criterion-related validity of the ASVAB. One hundred seventy-two studies from the military and civilian sectors and from the professional literature were reviewed and summarized to show averaged validity for military occupations. Reviewed studies established the validity of the ASVAB as a predictor of success in military technical training schools, and its validity for other criteria such as first-term attrition and job performance. Implications of the review for the military selection and classification systems are discussed.
