

Speed Dating the PTC Way!

Table Topics

1. What does "exam security" mean in the context of performance testing? What does "cheating" mean? What steps do/should programs using performance tests take to mitigate risks?

Moderator – Elaine Lopes

2. What evaluation methods can be used to evaluate if performance tests are successful in their required measures and customer goals?

Moderator – Diane Huntsinger

3. What technologies could you incorporate into your performance test? What is the educational or financial value for doing so?

Moderator – Kirk Schultz

4. Are there particular domains for which multiple choice is a more appropriate testing choice, all other considerations being equal?

Moderator – Jeff Frisk

5. What sorts of things should be considered with respect to scoring performance tests? How might scores (versus pass/fail) be used in personnel decisions?

Moderator – Johnny Weissmuller
